

## Why politics doesn't work - Part 1

**If politics were a product that were to be tested prior to launching it would fail on all levels, and would never have been launched. But it works fantastic for its real users = the politicians and their "bosses", the political parties and those behind these again, the New World Order.**

The hard truth is, politics is a vehicle of suppression, money laundering, theft of our income and rights, as well as plundering our countries' joint owned natural resources - to profit the political elite and their globalist partners. Politicians are highly paid actors claiming they work for us, when they don't.

### Let's take a look from a sceptical buyer's perspective - us!

#### **Do politicians actually represent us and work for us?**

No, they are handpicked by their private owners behind the political parties. These owners are the triad of Vatican, European royalty headed by the British and their private banker, the Rothschild family, in cooperation with their seven bank and business partners. **Politics is set up to ensure these get what THEY want.**

Politics is a freemasonry-run control system put in place by the above triad and we have to finance it with our salaries and slavery. A state is an occupant of your country, owned and put in place to rob and suppress you on behalf of the Vatican, European royalty and the banks, assisted by their fake legal system and fronted by their agents of organized crime, politicians - and each country's freemasonry - who together are at constant war with each country's population that each state occupies.

#### **Do politicians deliver the goods?**

No, the vast majority are only interested in lining their own pockets. They are highly paid actors, paid millions to lie to us on a daily basis, saying they work for us and have our interests at heart. Honest politicians don't last long in politics. They become corrupted, get murdered or leave when they learn that politics is organized crime.

#### **Do politicians keep their promises?**

No, the vast majority of politicians couldn't care less about their manifestos once you've voted them into power, because they don't have to. They are not accountable and cannot be prosecuted under maritime law because they are corporations = dead entities. They can do exact what they want towards you, because you handed over responsibility for your life **to them** when you voted. In today, with the SMART 5G LED genocide in place, when you vote you sign your own death certificate - you agree that politicians and political parties can do towards you just as they want - including killing you. When you vote you in reality agree to your own assassination.

#### **Are politicians honest?**

No, they are professional liars. They are paid to pretend you have a say in your own life.

**The hard reality is that all political parties at parliamentary level are owned by the same players behind the scenes - and the vast majority of politicians are freemasons and corrupt to the core.**

Behind the scenes all political parties have only one agenda - to effectively stealth plunder, rob and steal our incomes without us realizing it, as well as steal our rights, our ownership to our country and its natural resources, that we own jointly. These they steal from us through the erection of countless PLCs (corporations), where they appoint themselves as owners, or large shareholders. In this manner they steal up our jointly owned natural resources for nothing, as the world's monetary system is created abracadabra out of thin air.

**All money is monopoly money. If we created money out of thin air like they do, they would send a black ops team out to assassinate us within 24 hours - like they did to Gaddafi. That's democracy (demon-crazy) for you!**

**Is the state a service system for our country?**

No. It's a tool to rob, plunder and suppress us as explained above, presented to us as a service system - when it isn't. Its real purpose is hidden behind countless layers of bureaucracy and tediously formulated Acts, Conventions and Resolutions and the like to give itself a "legitimate" veneer when the whole system is fraudulent and founded on multiple layers of lies and deception.

Politics is intertwined with its partner, the fake legal system, that is also a control mechanism, hidden behind endless bla-bla-bla and open-ended interpretations of Acts, Conventions and the like so it is impossible for us to understand this - which, of course, is the whole point.

**The Government has been substituted by a Corporation or Administration which can NOT write laws. Instead all is Corporate Contracts. Nothing is lawful because this has been hoisted on living wo/men with intent to defraud us. The whole legal system is fraud. Fraud is unlawful.**

Everything in state is set up to function on a "need to know" and "have to know" basis, so the vast majority of administrators have no idea of this reality. Working in the state is treason and warfare against your fellow countrymen and yourself without you even knowing it. Taxation is theft.

**The state is an occupant of your country masquerading as a service system - a vast parasitic leech, stealing your income through taxation and countless invented charges, while it has no real expenses - because of their access to endless fake digital money. You literally work for free for them when you work for the state.**

**Are you getting the services you need locally delivered by your politicians?**

No. Politics is all about ensuring you get as little as possible - SO THEY CAN STEAL AS

MUCH AS POSSIBLE. As explained above, it's all about robbing and stealing from you, dressed up as democracy.

**Politics is controlled opposition. Any good proposals made are stopped by the Congress or the Senate/House of Lords and the like. All is controlled opposition and an illusion. You have no say in your life at all.**

### **Don't I have rights?**

No, none. The whole legal system is fraudulent. There are no Common Law Courts in the world. They are all Maritime/Admiralty/Military COURTS, doing business - hence your fake and fraudulent maritime courts in the US with their golden fringes representing the Queen, the Vatican and their bank associates.

You only have rights if you are a freemason, who are traitors, work as a lawyer, judge or in commerce above middle management etc, or are a politician. These are all exempt from the laws that they write for us. These are the footsoldiers and traitors that operate the political control system on behalf of the triad. Their benefits include earning a fortune by trading on the bonds the Crown erects upon your birth certificate immediate after your birth (see video below).

### **Is there an independent control system ensuring politicians do what they are supposed to do?**

No, WE are supposed to be that control system through elections, but because these parties hold a monopoly on issuing electoral lists in all elections, it doesn't matter what we want or say - they always win and get their way. The one choice we have to break the political system up is agreeing to bring in real direct democracy.

**This, plus the fact that they now plan to radiate us to death with SMART 5G LED technology is why we have two choices: we can do nothing and die, or storm the bastille in every country of the world to fix the political problem - once and for all.**

### **Who employs politicians?**

Politicians are employed by their parties who in turn are owned by international globalist interests. Once in power, these politicians decide their own salaries as well as setting up their own companies, for example road toll booths where you have to pay 5 dollar every time you pass. This goes direct into their private bank accounts. If you think this money goes to improve or renew the roads, you have been successfully brainwashed. In addition, in many countries, if not all, politicians receive millions into secret bank accounts in the parallel banking system for plundering their fellow countrymen.

If this isn't bad enough, you need to know that in addition politicians are SELF-EMPLOYED PLCs trading in their own name - making millions tax-exempt behind your back, with you having no idea. They are all freemasons - and as such have access to a parallel banking system set up for them, where they access millions that we should receive at birth on accounts in our name.

For example, Joe Bloggs is trading as JOE BLOGGS, Director of xyz Mining Corporation. He has access to his own trademarked name, = a corporation, in his CAPITALIZED name. All politicians at parliamentary level are corporate politicians - doing business for themselves. That business is to rob you, as explained above.

The Senate, Congress, House of Lords, Parliament, House of Commons and the like are all corporations/businesses. Those working in them, as said above, are self-employed within these businesses.

### **Do politicians spend their time effectively working for us, providing us what we need and want for our local communities?**

No! Politicians work for their masters. It's all Bread and Circus - with us as the losers.

Politics is no different from attending a pantomime. They stand up and down booing at each other pretending to be enemies and disagreeing on stage (in the House of Commons and the like) when just a few hours later they join over beer and laughter in the pub or over a glass of wine in their lodges. Do you still believe in this theatre?

As well as a pantomime and farce, politics and the legal system are deliberate control mechanisms using timewasting delay tactics - to ensure nothing good comes our way. For example: television debates with politicians. It's all about pretending they are doing something good for you, using their own controlled media to convince you of that, but when it comes round to delivering promises, there is some "technical fault" or "no more budget left" or "have to do more research" - or some other big fat lie - because they they DON'T WANT TO SPEND MONEY ON US. THEY ONLY WANT TO STEAL OUR MONEY.

**When your local council or politicians claim "we are short of money" don't believe them, demand insight into their accounts. You can be sure "no more money" = theft of your tax money into the local politicians' hands. They are now using the lie that local councils are "short of money" to insert SMART 5G LED battlefield technologies (i.e. to kill you).**

### **How can we get politicians to deliver the goods?**

You can't! They are all freemasons, who make their oaths to freemasonry and always serve freemasonry = themselves. They have no accountability and cannot be prosecuted because they are politicians and freemasons protected by their occult maritime law.

**Politics doesn't work because all politicians can be bribed, be compromised, extorted and murdered.**

You can't get anywhere in politics without creating some horrendous crime like attending pedophile parties where you secretly are filmed having sex with underage children, or even committing murder on camera. This way the global elite ensure that you keep your mouth shut about their criminal activities - "or else".

You might be wondering why the endignments don't go any faster in America? This is because all the Parliamentary politicians have "got something" on each other - so nothing happens. They've all participated in occult orgies, Bohemian Grove style, pedophile parties, spirit cooking, snuff parties and the like. This is the brutal reality of today's politics. All these systems are dysfunctional and have undertones of satanism.

### **How many "bosses" does a politician have?**

We are the politicians' real bosses, or so they tell us when they claim they work for us. However, having read the above you now know this is not true.

Had they worked for us, they would have had around 25,000 of us each to satisfy. How can a doctor have 25,000 patients? Right, apply the same to politicians. Even if a politician WAS working in your interest, there is no way he or she can fulfill the tasks he or she should be doing = putting your proposals and needs into action. And by the way, unless you get sound nutritional advice from your doctors, they are more or less only drugdealers, which means that they serve you no better than today's politicians.

### **Does politics provide unity?**

No! Politics is all about divide and conquer, ensuring the vast majority of the world's population never gets to see that it is politics, state and government that are our enemy, and not each other. It is a costly, time-wasting and polarizing system that doesn't deliver what it claims to. The democrats in America demonstrate this right now in 2019 / 2020.

### **Summary**

Politics is a freemasonry-run control and moneylaundering system that favors the world ruling elite and the politicians themselves.

Politics is organized theatre and a time-wasting control mechanism ensuring you DON'T get what you should be getting. It prevents us from having the great quality of life we could have, WITHOUT THEM.

Politics is an intentional divisive and time-wasting scam. It is about corporations getting what they want - it's not about providing us what we want and need in our local communities. **It is people focused rather than project focused and this is the crux - it doesn't do what it should do.**

Politics is hype, hysteria, debate, razzmatazz, propaganda, scandals and countless other diversions preventing us from seeing that **politics does not deliver the goods.**

And THAT'S why we need real direct democracy instead of the corrupt political run state systems' government, who work in favor of royalty, papalcy, the banks, and their freemason buddies in big business and THEMSELVES.
