

## Getting a grip on reality

**You have probably got friends who try to inform you about what is going on, like how politicians don't work for you, that corona virus is a bioweapon, inform you of the dangers of 5G and mobile 'phones and the like. When they bring up these topics you just roll your eyes, sigh and say "Oh, not again!" not believing anything they say, just dismiss them for being a "conspiracy theorist!"**

What if you're wrong? Do you believe everything you've been told and read and seen? What if I told you that what you think is reality is engineered by the same players behind the scenes that have the means to do so through media, lying politicians and an entire range of deceptions that you think is real - because it makes sense to you - based upon their propaganda lies?

The lies you learn at school, or more to the point, what you DON'T learn at school are essential to become aware of if you value your life. Unfortunately, most of us take facts presented to us throughout life as truths - having blind faith in institutions and people in so-called important roles in society, who **should** have our interests at heart - but in reality don't. It's easier to dismiss a friend or member of your family who tries to warn you of the deception than spend time investigating the possibility that there could be some truth in what they say.

This article wishes to take you out of your everyday lala land to make you see reality through the fog of deception you have been told and taught to be real. Are you aware that every thought in your head, whatever you put in your mouth and whatever you wear, read or see on TV is fabricated for you to keep you blinded from reality?

Let's look at how you think when experiencing things that is out of the ordinary. What would be your first reaction? Most people embrace what they are taught to think. This is hidden brainwashing, cooked up by some bright minds in media, experts in bringing you lies as reality while burying real lies in so incredible ways that you will never be able to see what is true or false, right or wrong, no matter what you think. See?

Could you actually be influenced by people who have the means and desire NOT to wish you well? What if politicians YOU trust and think work for you, in reality DON'T? Would you believe us if we told you? You've always been told they work for you, right? What if I told you they were self-employed and working for a large private-owned company that doesn't care less about you, only about making money OFF of you, and that

that large private-owned company is called government? What do you think? Answer the poll questions below.

We have provided videos covering different themes to give you a chance to pick which ones are true and which one is false. Which video do YOU think is providing false information?

**Boy, are you in for a surprise!**

2

**Let's get started!**

**Are you aware the vast majority of what you eat and drink is designed to make you ill for profit to the medical industry?**

Having seen the videos above you now know that today's mediKILL industry is only interested in making profits, keeping you alive, but not cured, so that they can make money off of you. Because of this we have included a documentary by one of the world's leading nutritional experts, Dr Joel Fuhrman, below so you can learn how what you eat effects you.

It is essential that you get a grip on reality and realize that politics and parliamentarism is an illusion, fraud and lie as well as a vehicle of suppression and plunder. In this day and age it is essential to learn reality - no politician works for you, but for themselves to fill their own pockets and the corporation - that THEY own. If you don't already know the difference between a country and a state and the significance of the corporation, learn about it [here](#):

Linked [here](#) is an article showing how today's fraudulent and criminal political and judicial systems are being used to support the genocide of the world's population. If you are not aware that politics is a stealth method to plunder your country, steal your income and remove your rights, read our series: [Why politics is a scam](#)

The video below shows a staged heated argument taking up some of the topics listed above. Florie's video is transcribed and attached as a pdf so that it can be read.

Transcript 1-30-20 Heated Argument Video 15 min 5G, Wireless... Improv with Ron/Flo

--For educational purposes only-- copyright Go With Flo cartoons 1993

It is about ten a.m. in Arizona – Flo is sleeping on a mat on the floor in the living room. The curtains are drawn. Flo lies under blankets.

R: all right what's going on in here...it's the afternoon...get up...it's too dark in here...I'm opening up the shades. (He opens the curtains briefly)

F: no, no, no please don't, please don't! I had my left eye I had a little, uh, a thing I can't take the... (He shuts the curtains)

R: it's too cold in here I need to get some heat in here

F: No! There's no heat. It's lasered like lasering...it's like living in an LED lightbulb...it's pure laser now. Not even any diffusers, that 5G is pure laser

R: Y'know this is not a laser - the sun is not a laser! The sun is a beautiful thing, it comes out in the day, and it shines! And it creates positivity and good stuff.

F: Vitamin D.

R: Yeah, alotta good stuff...why don't you get outside and get some of it so you can become happy and positive ...

F: they're blueing it out. I have it on video. They're blueing it out. Shut the blinds.

R: the blinds are closed, you can't get it any darker in here. What's with the damn sunglasses in the daytime? Nobody wears sunglasses in the middle of the day, in a dark cave, this is a hole, man. This is a very depressed - it's just depressing in here.

F: So, go somewhere else.

R: look man, people are gonna think you are doing drugs, man. People are sick of you. y'know the other day you told the lady at the center up there, you told her you're allergic to cellphones? Nobody is allergic to cellphones!

F: no, that's not what I said.

R: you make me look bad.

F: the guy had a bluetooth on his ear and someone asked him about it and I said well that's gonna burn your retinal tissue...those microwaves go not only...

R: you've been hiding my cellphone from me? I can't even find my cellphone, I'm lookin' all over for my cellphone, I find my cellphone on the bed, under a pillow?

F: Well, it never shuts off! It records everything you say it records all your texts, all your emails...

R: Who cares? I don't care about it

F: it's a surveillance device, it is! It GPS's you, it gives you heart attack frequencies. I know more people who had heart attacks...

R: you told the lady that they're spraying us with barium from the planes, some chemtrail pixie dust bull----! Y'know, everywhere you go you got this henny penny-ass attitude that the sky is falling – and that we're all supposed to live in this doom and gloom world, and you can't even be happy, cause the damn shades are drawn... (opens the curtain)

F: don't don't don't turn them on please... (he shuts the curtain)

R: yeah, you know why? Like this TV set. No one puts a fricken silvermesh lining...

F: only when it's off otherwise it'll shut the TV off...

R: what're you covering your eyes for? Huh? You're tellin' people this silver thing is gonna save your life? This is what your friend Helen sold you? You paid for that.

F: No, she didn't sell it to me... I got it as a remnant from, it was a defective piece and you can't wash it like the others

R: Y'know, I mean, you're just so obsessed with this 5G stuff...I'm so sick of this 5G! There gonna induct you into the mental hospital! You're gonna be in the mental institution here and it aint gonna be funny- you're gonna be in there telling people the Smartmeters are frying us...and the celltower, that's a mile away is supposed to be cooking us? You know that?

F: oh, c'mon. You know the science better than that, you can't be that dumb...

R: you can't even go to the center because of the Wi-Fi... the Wi-Fi is affecting your head? You called them that you couldn't go in there cause the Wi-Fi is too strong.

F: I don't need the center....no I didn't tell them that.

R: yeah you did.

F: when?

R: you told 'em that they all need blueblockers because they're eyes are being burnt?

F: no that's not what happened. My friend, she's 97...

R: you said we were under attack

F: I didn't say we're under attack. I said we're a high-tech Australia

R: look, I don't care where or who doin' all this stuff, or who taught you all this- I mean, it's just become too much of a conspiracy theory. I mean, people are sick of you. When you're walking down the street, people see you, and they run- they don't even want to talk to you because you have this negativity...

F: that's because they have those twirlie cars running around lasering people and radiating them from the bottom and they're illegal and they're here 'cause the Governor is probably under duress...

R: It's a self-driving car. A self-driving car is better for you than anybody that's driving a car- ...There is no mistakes. Computers don't make mistakes. It's a good thing we have some self-driving cars out here so that we can help the people, especially like you, get to the damn hospital so you can get some medication- you need some anxiety medication

F: it blinded me, it tazed me, it electrocuted, it shocked me and it burnt my ankle and it's still healing.

R: yeah, you got burned by the radiation

F: Yeah, I told my new M.D. about it. They're still twirling around. I guess...

R: I think you're just afraid. You know that? I think you're afraid to get out in the sun, and seeing the beauty of the sun, and how great the sun is. 'cause the sun ain't no sky laser. It's a wonderful thing – it breeds positivity, it creates life. You're not gonna get any better hiding in a cave with a candle - sleeping lower than the frequencies, c'mon

F: yes I am exactly seven feet lower than the Smartmeters that my neighbors have, that I pay extra not to have, for almost six years June fourteenth, will be six years, I've been paying twenty dollars a month - not to be electrocuted in my own house...

R: these damn cartoons ...all you do is draw cartoons about 5G and the world is coming to an end...y'know what- it's easy to breed fear into people...you know what's hard to do? Is to be nice to someone and tell them how nice it is, how great the world is. That's the problem. Everybody's just too damn negative. They've got this damn 5G stuff, that's ruining everything...

F: You don't even know what it is.

R: I don't care what it is...it can't be that bad

F: It's only good for driverless cars and robots. That's all 5G is good for- driverless cars and robots. That's it!

R: do I look like I'm suffering from EHS, EMF, EFG or H-I-J..

F: yeah, it sounds like your frontal cortex has been burned.

R: it's cold in here, and it's hot outside, so I say we open the shades...and let the sun shine in.

F: you can open the shades and I'll go into the garage!

R: yeah, you go in the garage- then what -where all the water's stacked up – you're supposed to be blocking some radiation?

F: no, the water, I threw that out, I recycled them.

R: you're not getting poisoned...the electric company...

F: Medicare and Medicaid have codes for electro-hypersensitivity, radiation poisoning, a pre-existing electro-hypersensitivity and then...

R: y'know people are getting a check now for being what you got now...

F: they're not getting a check here...maybe in Sweden and in France

R: they're getting checks for complaining about- they've got 5G-itis

F: no, no, that'll never happen because we won't live long enough to see it.

R: y'know, the celltower and the smartmeter and the sky laser, you know what that sounds like-

F: and the chemtrails- what about the chemtrails?

R: what are you doing outside filming the damn sky for...

F: it looks like a tic-tac-toe board

R: it's the exhaust, it's the comtrail from the back of the plane, the plane goes and it puts out a comtrail- that's it.

F: I see you have a close relationship to the Paleolithic man... Neolithic...Neanderthal... maybe the Neanderthals were smarter because than us, they're closer to nature...

R: this is just so depressive- everytime I ask you a question, oh, it's because of the cellphone... just quit hiding my cellphone from me, I'm not being burned by a cellphone. All right? Obsessed with this stuff...everytime I talk to you I ask you a question and you give me some smart answer like, oh, it's because of the cellphone.

F: I have a cellphone for emergencies only

R: you've gotta quit preaching to people and scaring these people they're gonna...

F: no, I'm not! My neighbors do not know the wiring of their house is being compromised, the integrity is being rotted away, with an illegal, non-coded, appliance, military assault frequency weapon on their wiring. So you have a high voltage on low...

R: well, it don't look the people across the street are having a problem, all these old people around here, they don't look like they're dying...

F: there're a lot of young people now too

R: well, they're no complaining about it- it's just you- you and a band of people who just want the world to end...I mean, you're not gonna be happy unless the bomb hits, blows up, and there's a big mushroom cloud and you can say- I told ya so- that's what you want- that's what you want- take the sunglasses off...jeez...no one wears sunglasses inside the house

F: they're prescriptioned

R: prescriptioned.

F: Yeah, real glass, there's no metal- very little- just two screws and a plastic frame-

R: y'know, this conspiracy theories, you and all your buddies online – that they live to complain- it's like a band of complainers, everybody's gotta complain- oh my back hurts- I can't see anymore because of the smartmeters...

F: the L.E.D.

R: L.E.D.

F: the LED lighting is laser with diffusers in it. There's no difference, they share the same eye injury chart- so if you have Glare on level one it makes it level two, level three ...level four is blind- adios.

R: they're working on technology right now, I'm sure that whatever problems there are they're gonna fix it- and they're gonna make it all sweet for everyone - they're gonna put a celltower over here so I can get better reception on my phone

F: yeah well, Senator John McCain had a celltower in his backyard and he didn't live to be very old.

R: you blame death on 5G, you blame any kind of problem, if anybody feels bad- I could have a pain in my ass...and you would blame it on a smartmeter - you'll blame it on a celltower. It's just too much- you can't have that much depression.

F: I'm not depressed about it! It's just people have a right to know! What's the big secret?

R: it's the middle of the day and you're sitting inside a cave?

F: you have two point four five gigahertz in a school's Wi-Fi, and 2.45 Gigahertz of radiation is a stealth weapon, doesn't that tell you there's something wrong here?

R: look, lady. You buy blueblockers, you live under silvermesh lining, vampires wear silver, man, mesh you wear that-

F: you can't wear it where there's a lot of high tension wires, or where there's a lot of bad, dirty electricity

R: so what about the sun outside? Don't you want to get some heat in here?

F: I like the sun but they're doing something to it. NASA announced it on a public video, January 2017, that Arizona was chosen to be the experimental testing ground for SRM - solar radiation management - to prevent global warming but its causing it-and we have all of the capture planes took all of the stuff that they're spraying and we send it to Europe to get analyzed cause they're the only ones who will do it – cause everyone is scared to death...

R: crazy, obsessed

F: ... they're gonna be killed if they try to not promote all of this stuff- it's just a big kill grid.

R: you told them that Wi-Fi is a weapon of war?

F: no, it's a Stealth Weapon frequency

R: so now they're afraid to go over to the center now, because they're afraid they're gonna get burned, you're scaring people -

F: no, they don't pay any attention, I'm not scaring anybody

R: you're breeding scare- they're gonna send someone to pick us both up...they're gonna think I'm crazy... you're making me look bad, you're making yourself look bad by breathing all this conspiracy

F: Wi-Fi has to be removed from all schools and all public places including especially the universities, because it sterilizes, it heats up the DNA ...

R: Don't you think they would've figured this out already and protected us from all this?

F: Yeah, they're trying to keep the population down.

R: yeah right. They're trying to kill us, huh? Our own government and the world is trying to de-populate us, right?

F: I'm going back to sleep

R: Yeah, you go awright.

**The End**
