

State versus land

The state is the system that runs a country to make certain that the owners of the state get as much money through non-elected political power as they can - and we the people have to pay the bill - not just through money or resources - but with your life when ordered to go to war to further benefit these criminals - and don't forget, all the drugs, weapons and human trafficking they are behind, as well as, the worst of all, pedophilia.

Most of us have no idea of the difference between state and country and think they are one and the same thing, believing the state is a deliverer of joint-services. In reality the state is a private-owned corporation in your country, literally the unlawful occupancy of your country on behalf of those controlling the world behind the curtain, today posing as your lawfully elected government and administration, when that is not the case because we the living man and woman of the living land have not handpicked these people as our candidates to vote for or represent us. The owners of each state are the powerbase of THE Estate of the Vatican, with their joint owners European royalty and the banks.

All local forms of government like local councils are also private-owned companies, often with local politicians and mayors sitting as the joint-owners! All this is organized by political parties rooted in freemasonry with them hiding this fact from you, and

never showing you their accounts or admitting this reality.

The same goes for COURTS, that are all private-owned businesses operating under Commercial Law and not Law of the Land as they should be, because Commercial Law, also known as Maritime Law, has to do with trade and not living man and woman, but what political traitors have done is turn all Courts into private-owned businesses where each judge runs his court room as his own private business, he "presides" over his courtroom. He or she is its President, it's a business - just like Trump is the President of the UNITED STATES OF AMERICA CORPORATION. Did you know that?

2

There are no real rights for us living man and woman today as we have been forced into the state corporation's stealth commercial law system at birth, treating us as slaves, redefined as PERSONS, which has nothing to do with living men and women. [See more about Maritime Law here.](#)

We the people were never informed and have never accepted to be part of today's corporate-run political system which has been forced upon us from birth since 1954, and a major reason why we need to get rid of both parliamentarism and politicians as well as today's monetary and law systems, ALL of which are rigged against mankind, and work in synergy with each other against us!

We don't need politicians or the huge bureaucracy of today, but instead real direct democracy with a transparent service system served by faithful experts providing us the services politicians and today's bureaucracies do not provide, combined with a system where we the living man and woman are the values and not another fake monetary system with "someone" rigging the values of the metals etc behind the curtain.

A country is a land belonging to everyone living in it, including all natural resources on and under land and waters and the sales of the profit from these abroad. This is, of course, the main reason why politicians "run" our country = to steal our country's resources and make money off them, and us, with you now having to pay for what is rightful your's - at a price they decide (petrol, oil, gas, water etc).

In their state system you are used as free labor AND a tax payer. Your salary is paid in digital money that they produce out of thin air, and use you as collateral for. They give you nothing, just pay you enough of their fake money to buy their products and pay the bills at the end of each month - after having paid your taxes - to them! On the other hand, the work you do for the state owners is very valuable to them. You do their dirty work for them without knowing it, especially all those state paperpushers who spend their time forcing us to apply for this and that permission so they charge us (in both senses of the

word) for so-called services even though they have already stolen our wages through taxation and operate on fake digital money so we shouldn't be paying them anything!

State administrators are used to strangle us to death with their fake laws and fake policies, and carry out the dirty and fake propaganda lies of their bosses, just like doctors and nurses are used to mass murder mankind with vaccines. "We just follow orders" they all claim while they assist their criminal bosses towards the goal of the extinction of mankind combined with worldwide tyranny.

So you working in the state, why not quit and find yourself an honest job and support real direct democracy where we, the living man and woman together decide how we want everything in our country and life to function in our favor through majority vote.

Know that there are already military tribunals taking place in different locations worldwide, including Cuba, and soon it will become common knowledge that large numbers of people, including many well-known celebrities are going to be put on trial and executed or receive life imprisonment for high treason, for aiding and abetting the corona fraud and "vaccination" genocide as well as multiple other crimes against humanity, like pedophilia and mass murder of children and child trafficking. Are you sure

you want to be on THEIR side when this becomes common knowledge?

If you work for the state know that your bosses are the satanic elite driving the global genocide which makes you their footsoldier for their agendas. Do you want that?

Government is a corporate political freemason-run control system used to suppress and milk us like cows to fill their pockets. It is used to suppress, rob and control you while pretending they provide services they claim we need (to control us) such as a driver's licence, passport or transport and health services etc. And to pay for these "services" we have to pay tax, or so they say, claiming our stolen wages (tax) is used for providing these services, but in reality they have NO expenses, because all states use fake digital money. Tax is pure and simple theft of our wages.

And by the way, you are under no obligation to have a driver's licence issued by them as long as you know how to drive a car. It's all about controlling, suppressing and deciding over you because you are a slave in their eyes, and slaves do what they are told!

No longer, wake up! Stand your ground and claim your rights as a living man and woman. It is for these reasons and many more we have to forget about parliamentarism, which is just what the two words

making up this word reveal: parler and mentir
(French) = speak lies.

We can't build tomorrow out of yesterday. Yesterday's solutions didn't work and don't work today, we need to think out of the box and create something new.

We need to rebuild our lives how we desire them, where we participate and codecide how we desire life to be, and for these reasons we need to set up a real direct democracy with a complete new Law, the Law of One, also known as Universal Law. We will write more about this in a later article.

To reclaim your life as living man or woman reclaim your strawmen and your rights as living man or woman at the <https://www.commonlawcourt.com/> or similar in your land. This way they no longer have ownership to our free services, money or land/valuables and natural resources.

This is the first step to take to leaving today's non-functional and parasitic societal control systems, from which we together can build real direct democracies as living men and women of the living land, sea, water and space, and as living man and woman with our Creator-given rights create a very positive future for mankind on Earth.
